

elements™ IC

OBTURATION SYSTEM

The cordless elements™ IC obturation system combines a Downpack heat source with a Backfill extruder. The Downpack device provides fast heating of the heat plugger with precisely controlled temperature and timing, making it suitable for single-motion downpack obturation of the apical portion of the root canal. Utilizing single-use gutta-percha cartridges, the ergonomic Backfill device has a motorized extruder system for precise temperature and speed control for a 3-dimensional obturation of the root canal system.

CONTENTS OVERVIEW

Power Cord

Transformer

Heat Plugger

Supplied only with Downpack and combo unit

Needle Bender

Supplied only with Backfill and combo unit
