

## What was once Hygenic is now HySolate the new Dental Dam Range from Coltene

Complete isolation with Dental Dam is part of the endodontic and restorative work flow. Teeth are isolated from the rest of the oral cavity and the working field is set dry. Using Dental Dam protects patients from aspiration or ingestion of foreign objects and protects soft tissue from contact with instruments.

**HySolate Black Dental Dam** has the template for marking the tooth position printed on. This saves the working step of marking the dam before punching. Like the Knight figure in a chess play you can leap steps, move faster and clever towards the goal of absolute moisture control.

The black colour provides ultimate, clear contrast and is ideal for taking photographs.

- Pre-printed dental dam reduces the number of working steps
- Black colour provides ultimate, clear contrast and is ideal for taking photographs.
- Powder free, low protein latex quality reduces the risk of developing latex hypersensitivity
- Acts as an infection control barrier
- Creates a dry operating field

FROM HYGENIC		TO HYSOLATE	
CW-H00539	HYGENIC Dental Dam Latex Dark Medium 152x152mm Box 36 sheets	CW-60031352	HySolate Dental Dam Black Latex Printed Medium 152x152 36 box
CW-H00540	HYGENIC Dental Dam Latex Dark Heavy 152x152mm Box 36 sheets	CW-60031353	HySolate Dental Dam Black Latex Printed Heavy 152x152 36 box
CW-H00541	HYGENIC Dental Dam Latex Dark X Heavy 152x152mm Box 36 sheets	CW-60031354	HySolate Dental Dam Black Latex Printed X-Heavy 152x152 36 box

**HySolate Latex Dental Dam** is made of pure, natural rubber latex and is powder free. Powder free, low protein Dental Dam is a simple and clever measure to reduce the risk of developing latex hypersensitivity. Latex Dental Dam provides strong retraction. The lighter colours have the advantage of naturally illuminating the operating field whereas the darker colours can help with visual contrast.

- Powder free, low protein latex dam reduces the risk of developing latex hypersensitivity
- Increased visibility on the treatment site through isolation
- Acts as an infection control barrier
- Creates a dry operating field
